

O Rumor do Fumo – Residency Programme 2019  
International residency: 5 – 31 August 2019

## *Self with mistake* by Henrique Furtado Vieira

My research is based in transhumanism and 21st century technology, which may affect our ideas of the body in morphology, dynamics, sexuality, gender, identity aspirations, and our way of investing the world with gestures. I see cyborgization, virtualization and humanity's imminent fusion with a cosmic data processing system where information is infinite, shifting and blurring the boundaries of our physical and mental bodies, as starting points for creative speculation.

Creation: Henrique Furtado Vieira

Research Contributors: Céline Cartillier and ErGe Yu

Support: O Rumor do Fumo – Residency Programme, Self-mistake Grant
